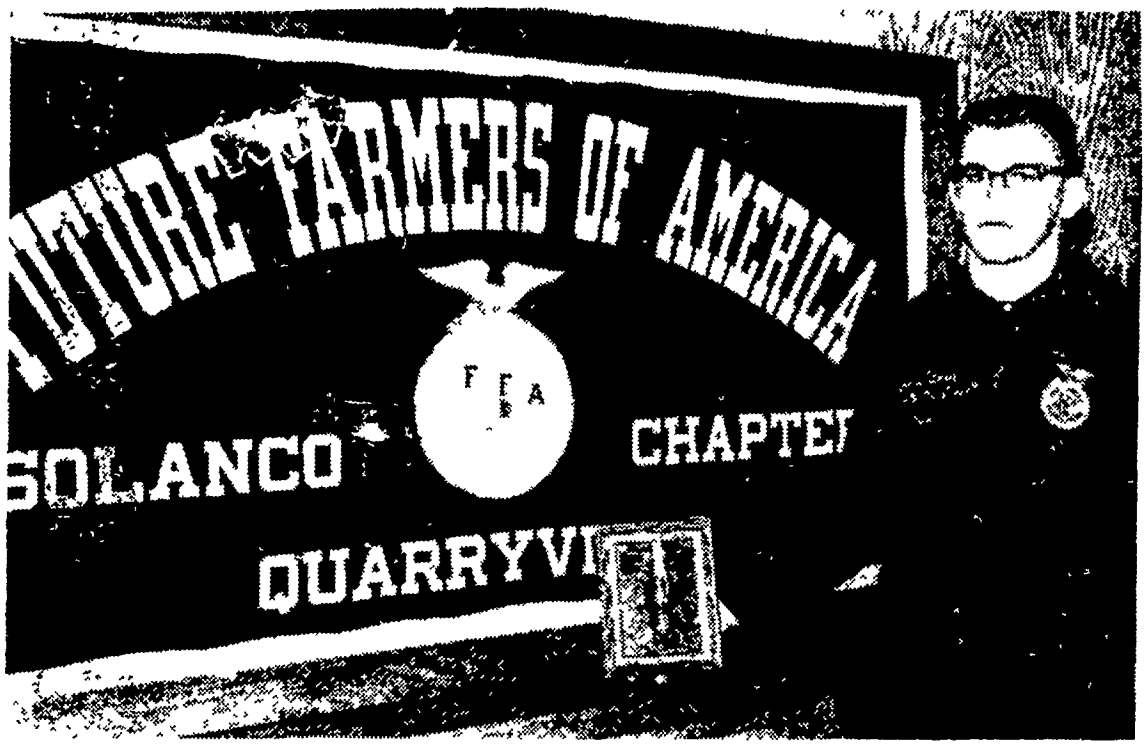
Lancaster Farming

VOL. 10 NO. 9 | Lancaster Farming, Saturday, January 30, 1965 | $2 Per Year



STATE STAR FARMER, JOHN J FREY, Quarryville R2, shows one of the many trophies he has won in FFA and 4-H Club competition during his four years as a student in Vocational Agriculture. After graduation in June, John plans on college at Penn State University. L. F Photo.

John Frey Climaxes Great FFA Career In Becoming State Star Farmer For '65

Being named winner of the highest honor that the Pennsylvania Future Farmers of America can confer, State Star Farmer, seemed a very fitting climax to the outstanding FFA career of John J Frey, 17-year-old senior at Solanco High School Although John can continue in FFA work until he becomes 21 years old, he recently received his notice of acceptance to the College of Agriculture at Penn State University, and a full-time college schedule does not allow time for much else

The honors, awards, assortment of plaques and the achievements that John has accumulated in the past few years are too numerous to list here, but to mention a few recent ones he led the county 4-H livestock judging team, first to the state championship, then to eighth place in national competition, he showed the grand champion steer at the Eastern National Livestock Show for two consecutive years, he had the champion 4-H, FFA steer at the Pennsylvania Livestock Exposition in 1964 and went on to take the reserve grand championship at that show; he is president of the county FFA association, academically, he is a member of the National Honor Society—which means that he maintained at least a "B" average during his first two and one-half years of high school; and he is president of the Senior Class at Solanco

The story behind this enviable record perhaps began when John was about two years old It was at that time that his father, a cattle dealer, was killed in an accident. Mrs Anna Frey had a farm and eight children to raise.

Co. F & H Campaign "Kicks-Off"; 520 Volunteers Canvass County

Solicitation of contributions and pledges of support for the Farm and Home Foundation Campaign is now under way, throughout Lancaster County, according to Levi H Brubaker and Lawrence H Skromme, General Co-Chairmen of the drive Following a "Kick-Off" Rally of volunteer workers, held in Strasburg, Wednesday night, canvassing got under way in the southern and eastern areas of the county.

With several hundred men having started making contacts with every farm family in the northern end of the county, following Monday night's rally of volunteers in Lititz, a total of 520 volunteers, practically all men, is now at work in behalf of the $375,000 campaign The Farm Gifts Division carries responsibility for raising at least two-thirds of the total amount needed, drive leaders announced.

In launching the campaign, officials point out that attainment of the goal will provide a solution to several major problems of long-standing concern to agricultural leaders of the county M Maxwell Smith, County Agent, in speaking before both rallies of volunteer canvassers, indicated that the establishment of a Farm and Home Center will be of distinct advantage to both farmers and residents living in the suburbs Smith said that the growing interest in developing attractive lawns and gardens, in recent years, has re-

Consv. Leader Blasts Cut In Resource Funds

The President's budget proposal to cut back federal support for conservation on privately-owned lands of the country was attacked by the president of the National Association of Soil and Water Conservation Districts as a shocking and dangerous reversal of national policy on resource development

"A 20 per cent cut-back in technical assistance and a 40 per cent reduction in cost sharing aid along with reduced federal support for conservation research programs, would reverse a national policy started 30 years ago and force a severe set-back in America's soil conservation and water development efforts" declared Marion S Monk Jr, President of the Association and a farmer at Batchelor, La

"More than 70 per cent of the nation's land is in private ownership This is where the lion's share of the resource work for America's future must be done," Monk added

AFBF Leader Supports Govt's Tighter Stand On Farm Spending

Charles B Shuman, president of the American Farm Bureau Federation, recently issued the following comment on the budget message transmitted to Congress by President Lyndon B Johnson

"President Johnson's budget message to Congress indicates a realization that the cost and scope of present government farm programs are indefensible It is increasingly apparent that these programs must be substantially revised in the interests of farmers, consumers, and all taxpayers

"While we believe President Johnson has underestimated the number of farms that will be needed in the future, the American Farm Bureau Federation stands ready to work with Congress and the President in constructive ef-

Tobacco Quota and Referendum Info Released

It was announced Thursday by the office of the Secretary of Agriculture that the national marketing quota for the 1965 crop of Pennsylvania Seedleaf tobacco would be set at 44 2 million pounds

It was also announced that Thursday February 18 was set as the date for a growers' referendum on quotas for the next three crop years In terms of acres, this quota figure would amount to about 24,000 acres available for 1965 crop allotment

The allotment figures for county breakdown were not available at press time, but it was estimated by the local ASCS office to be in the neigh-

PFBCA-Agway Merger Gets Local Approval

The stockholder representatives of Pennsylvania Farm Bureau Cooperative Association recently voted to merge their organization with Agway, Inc. of Syracuse, N Y. The merger takes effect July 1, 1965

The decision by the PFBCA stockholder representatives followed a series of votes on the merger proposal by members of local Farm Bureau associations across the state. Of the 34 local associations voting to date, 25 have approved affiliating with Agway. Lancaster County Farm Bureau Cooperative Association voted last week for the merger.

The Agway Board of Directors approved merger with Pennsylvania Farm Bureau at a meeting in November.

In joining Agway, the Pennsylvania cooperatives become part of a farmer-owned purchasing and marketing organization serving 12 northeastern states

The stockholder representatives' action is the culmination of discussions which were started by GLF, Eastern States and PFBCA in 1960, about possible joint operation of some production and warehousing facilities

Weather Forecast

WEATHER

Temperatures for the five-day period Saturday through Wednesday are expected to average below normal. There will be some moderating temperatures about mid-week. Normal for the period is a high of 39 degrees and a low of 23.

Precipitation is expected to amount to much less than ¼ inch melted. This will occur as snow late Saturday or early Sunday.

Ful-O-Pep Cattle-izer Dairy Feed

TRADEMARK

is the talk of dairymen everywhere

Here's why: In milk room after milk room, gleaming tanks are filled with evidence: more milk per cow . . . more milk per ton of feed.

Representing a new concept in dairy nutrition, Ful-O-Pep Cattle-izer Dairy Feed allows the cow to get as much as 20% more energy from the same amount of feed. This extra energy is used to produce more milk.

That's why North, South, everywhere . . . dairymen are talking, checking, and *feeding* new Ful-O-Pep Cattle-izer Dairy Feed.

Ask your neighbor about his results with Ful-O-Pep Cattle-izer

Weekly Broiler Report

PLACEMENTS INCREASE

Placements of broiler chicks in the Keystone State during the week ending Jan. 23, totaled 759,000, according to the Pennsylvania Crop Reporting Service. The placements increased 12 per cent from the previous week and 16 per cent from a year ago Settings for broiler chicks totaling 1,510,000 increased 5 per cent from the previous week and 16 per cent from a year earlier. The current 3-week total of eggs set increased 21 per cent from last year. Inshipments of broiler-type chicks during the past 10 weeks totaled 259,000 or 52 per cent below the comparable period in 1963-64. Outshipments (2,101,000) were about 7 per cent above the comparable period a year ago.

Placements in the 22 major producing states totaling 39,619,000 chicks increased 2 per cent from the previous week and 8 per cent from a year earlier. The 10-week total increased 2 per cent from last year. Settings of 57,754,000 increased 2 per cent from the previous week and 8 per cent from a year ago The 3-week total increased 8 per cent from a year ago

Fogelsville

(Prices for dock weights, ¢ per lb. except where noted.)

Hens, light type, range 4½-8½, mostly 5; Hens, heavy type 8½-20, mostly 12-19; Pullets 20-29½, mostly 25-28; Roasters 10-28½, mostly 20-26; Capons 33½-35; Ducks 20½-31, mostly 25-29; Drakes 35-39, Geese 20-32; Turkeys, toms 21-23½; Turkeys, hens 28-31, Rabbits 27-43½, mostly 36-39; Guineas 45-52½; Pigeons (per pair) 40-97½, mostly 65-70; Jumbo Squab 85; Total coops sold 996.

Eastern Pa. & N.J.

Supplies of light type hens fully ample for a fair but unaggressive demand. Some flocks averaging 4½-5# moved at the higher price levels. In instances processor demand improved where advertised retail features occurred as low as 19¢ Demand only fair for heavy type hens. Offerings adequate. Limited flocks of 6-7# hens sold at 17¢. Prices paid at farms: light type hens 3-5¢ mostly 3½-4¢.

● Delmarva

On the Delmarva market, live broiler and fryer prices declined approximately ¾ cent. Demand was only fair for light auction offerings despite widespread extension of pick-up dates.

Ready-to-cook demand was spotty, ranging mostly slow to barely fair in instances. Interest for next week was very slow in developing. Delivered prices were mostly 1 cent lower in an unchanged range.

Estimated slaughter for Friday and Saturday, 624,000 head compared with 713,000 head last weekend.

Prices paid and reported purchases for the 24-hour period ending 10:30 a.m. Friday: broilers and fryers. 15.8-

From Where We Stand . . .

More Hogs In '65?

Could 1965 be the year in which you will give serious thought to raising hogs? Maybe it should be, because the hog market looks good, for at least the first half of the year.

There are hogs being raised in the county, of course. In fact Lancaster and York Counties lead the state in number of hogs produced. But there are few, if any, really specialized hog producers in our county. Most of the hogs are kept on steers, and others are a little like the old backyard chicken flocks that used to be in evidence everywhere.

Perhaps running hogs behind the steers is a sound way to approach the problem — certainly it has been an accepted way in Lancaster County. But that which is accepted is not necessarily the most profitable way. There have been tremendous gains in feeding and breeding swine in recent years. Is this new knowledge being fully used? Obviously we feel it is not, or we wouldn't be talking about it.

There are feeds and feeding programs, and crossbred hogs available in this area that will enable a grower to put a 200-pound hog on the market at 140-days of age, or less. True, the steer-hog feeder will say he can't do it that fast but it doesn't cost him as much per pound either It could be that it doesn't cost him as much in "out-of-pocket" costs, but how about the income he lost by marketing only half or two-thirds as many hogs during the year's time? And what about the fact that after a hog reaches a certain stage of maturity it puts on more fat than meat?

What we're really saying is that it seems there is room for both kinds of pork raisers in the county, the hog-steer man and feeder who "specializes" in hog production. But the future in the hog business will probably belong to the man who keeps his own breeding herd, using crossbred sows and gilts and purebred boars, and marketing his hogs on some kind of an orderly basis which includes payment based on quality. Or, he may choose to buy his feeder pigs from someone specializing in that field. Either way, he's going to be interested in handling quantity and quality, and he's probably going to employ automatic equipment rather than labor to do this job.

The economists tell us that the long-range outlook favors beef. They say that as family incomes increase, and the price of beef remains competitive, people wi'l buy beef at the expense of pork. Since economists and statisticians can usually snow us under with the sheer weight of their facts and figures, we seldom argue with them. We would point out, however, that while we should be mindful of the long-run, we still have to get there one day at a time. There is still going to be a good many billion pounds of pork and ham consumed annually in this country, and we're sitting right along side of a fair share of that consumption. Why do we insist on giving that business away to farmers from other parts of the country while we remain a hog-deficit area?

What Do **YOU** Think?

★ ★ ★ ★

" . . . . . To The Last Hedgerow"

Millions upon millions of words have been written and spoken this week in commemoration of the Great Man. The praises and the memory will live on, but The Man is gone. As one reporter said, there are few people living today whose lives were not touched by the fact of his existence.

Churchill was one of those rare individuals who, as someone once said (was it Abraham Lincoln?), had "greatness thrust upon him".

He has been called "The man of the century". It almost seems as though he had been born to fulfill one brief moment in history. Britain's "finest hour" was his greatest triumph. With it he and his brave people bought the time needed for the rest of the free world to assure freedom to its descendents.

Winston Churchill was half American, half English, and all Man. We are thankful that he chanced to pass this way in our lifetime.

● John Frey

(Continued from Page 1)

John's elder brother, Fred, took over the management of the farm Fred had been winning beef shows before John was born and his tutelage was probably the key factor in preparing John for the success that was to come to him in the show ring in the years ahead This success first became evident when John showed the grand champion at the Garden Spot Baby Beef Club Show at the Lancaster Stockyards at the age of eight years

From this close farm-family background, a boy has developed with a bit more than the ordinary share of talent and good breaks The successful family history of steer showmanship perhaps gave him a head start over most other lads his age But the fact that he was able to take advantage of those breaks indicates a great amount of natural ability and determination

It is usually impossible to trace the full impact that a student's teachers have had on his development; one can only guess at this John's vo-ag teachers — William Fredd, Ralph Layman, and J Richards Wood—each undoubtedly have contributed, tangibly or intangibly, to that development They regard John as an excellent student, and one whose potential was evident from the beginning of their association with him

Where does a youth who has come so far, so fast, go from here? Only time can completely answer that question, of course, but a good guess might be that from here on John will achieve just about anything on which he sets his mind

SCS Honors Hackman At Consv. Workshop

At a 2-day conservation-workshop meeting at Lebanon this week, the U S Soil and Water Conservation Service cited Henry H Hackman, Manheim R2, for his many contributions to soil and water conservation in Pennsylvania. The award was presented by Ivan McKeever, state SCS conservationist

SCS personnel attending the meeting from the county were Wayne Maresch, Abner Houseknecht, and Harry Kordes

At the annual meeting of the Pennsylvania Soil and Water Conservation District Directors last Fall, Hackman was also cited for his outstanding conservation efforts. Hackman, a Lancaster County SCD director, has previously served two terms as president of the state group

Background Scripture: Matthew 11 and 12.
Devotional Reading: Isaiah 55 1-11

In the Middle Ages, it was the annual custom in some places to force a few Jews to be baptized at certain festivals during the year. It didn't make any difference how much the victims objected. They would be dumped into a tub of water and a few Latin words said over them and then the Jews would be counted to the credit of the church that year as "converts." Blasphemy? Yes, of course: the church was trying to do the impossible. No one, Catholic or Protestant, can be found today, who would suppose for a minute that you can make converts by force. No one is or can be a true Christian (or for that matter, a true republican or trombone player or anything else) by force. Religion begins in the heart, and unless your heart is in it, you are not in it.

Dr. Foreman

Jesus of Nazareth knew this very well. He suggested, urged, even commanded people to follow him. (Notice, he always would say Follow me, never Follow me, please!) He wanted followers, needed them and they of course needed him. But he wanted free men, not driven victims.

Accept or else

It is true some Christians would tell you they had been almost driven to become Christians. But in that case, what drives them? Not the fear of torture and death, as in the case of those Jewish "converts." There is something more sensible, something infinitely higher than physical force. There is (among other "drives") the reflection on the alternative. Accept Jesus? Well, what if I don't? I am free, you say, to reject him,—that is, step inside the circle of faith or to stay outside. But what if I decide to stay on the outside,—what happens to a man who says No to Christ? Well, he is not threatened with disease, disaster or death. That is compulsion by force, and we repeat, God does not win followers by that method. Still there is an "or else."

First of all, not to accept Christ means not to accept what he was and stood for. Take three out of many examples. First of all, rejecting Jesus means rejecting his compassion, his sympathy with and for the unfortunates of this world. His sympathies were always with the victims of the cruelty of society, never with exploiters and oppressors. Reject him, and you yourself become a part of the problem of mankind, you have no use in whatever good solution may be found. To accept him means to share in his sympathy for the wounds of mankind. To reject him means to tear those wounds afresh.

Ship without rudder

Again, ignoring and refusing Christ means rejecting his commands. There are two kinds of judgments of God, theologians tell us. One is the kind that are imposed by a magistrate's court (for example) for speeding. The fine is $25 in a certain county; but it might as well have been $20 or less or more. Besides, not everybody who speeds gets caught, and not all who get caught are fined. Now the other type of judgment is not this police court variety; it is called "consequent" judgment. It is automatic,—no need of a court. It is universal—there are no exemptions. It is natural, not arbitary. If you are careless with a tractor and get run over, that is consequent judgment. If you neglect your health and get TB, that's consequent judgment. Now if you reject Christ, you reject his commands, of course. And what does this bring on? Consequent judgment. If Christ is the true Revealer of God and of his will, then taking direction from any other source is to live against the grain of the universe —and that's fatal

FLORY TO MANAGE ALABAMA HATCHERY

Lancaster, Pa. — Indian River Poultry Farms, Oregon Pike, Lancaster, has appointed Clarence Flory, a native Lancaster Countian, to manage its new hatchery in Athens, Ala Indian River is a major producer of broiler breeder cockerels and a department of Pioneer Hi-Bred Corn Company, Des Moines, Iowa.

Mr. Flory is a graduate of East Lampeter High School, class of 1957, and has been associated with Indian River's Lancaster office for the past three years He is married and has one child.

Now Is The Time . . .

MAX SMITH

To Eliminate Drafts

Dairymen operating stanchion barns should be on the alert for drafts on their milking cows A cold blast of winter air in any regular amount on the working udder of a good cow may be all that's needed to start a serious case of udder trouble. Controlled ventilation systems where the air is brought into the barn through a large number of small openings is much safer than manual control of doors and windows that may bring in large volumes of cold air. A special circular is available on dairy barn ventilation.

To Beware Of "Tame" Wild Animals

Wild animals change their ways when they develop rabies; they may become bold, quiet, and aggressive when in a rabid state. Foxes, skunks, raccoons, and dogs seen about the buildings during daylight hours should be regarded as dangerous. Be extremely careful when handling wild animals; caution children not to pet strange animals. Rabies is an incurable disease so don't take chances.

To Prevent Off-Flavor in Eggs

Off-flavored eggs are usually attributed to improper storage conditions. Moldy conditions, perfumed detergents, and odors from onions, apples, cabbage, fruits, and oils can cause off-flavored eggs. The egg shell is porous and can easily absorb odors. Eggs are an important food and should be handled and stored carefully.

To Prune Trees

The months of February and March are very good times to prune fruit and shade trees. The trees are dormant and should be shaped before the new growth starts in the Spring. Diseased, injured, or dead wood should be removed. Pruning dormant trees when they are young determines to a large degree the shape and beauty of the tree in later years.

● Consv. Leader

(Continued from Page 1)

"The cuts would destroy the momentum built up during the past 30 years by the federal-state-local partnership that has given our country unprecedented conservation know-how and progress."

The Association headed by Monk is composed of 3,000 individual Conservation Districts in 50 states, with two million cooperating landowners, largely farmers and ranchers.

Monk voiced particular opposition to a proposal in the budget that Congress authorize a revolving fund through which Soil and Water Conservation Districts, and individual farmers and ranchers, would make $20 million in payments to the federal government for scientific and technical assistance provided by the Soil Conservation Service of the Department of Agriculture

"This proposal by the Bureau of the Budget shows a total lack of understanding about the national interest in conservation and the nationwide benefits realized from this work," Monk declared. "Landowners already contribute far more than the government to conservation and development of soil and water resources. The results benefit all Americans — the businessman, housewife, sportsman, consumer, and especially the children who will inherit our land — and all these must be listed among the chief beneficiaries"

Under the revolving fund proposal, federal appropriations for "Conservation Operations" of the Soil Conservation Service would be reduced from $104,223,000 to $84,103,000 in fiscal year 1966. The $20,000,000 difference would be made up by payments into the revolving fund by Districts, farmers, and other landowners

"The revolving fund proposal, coupled with the recommended cut-back of 40 per cent in cost sharing funds, would result in a decrease of at least 50 per cent in the application of conservation practices on the privately-owned lands of America, and would reduce the quality of the practices applied," Monk predicted.

"The revolving fund proposal would reverse a policy of 30 years standing With the creation of the Soil Conservation Service in 1935, Congress began a policy of providing SCS technical assistance without charge to the private landowners of the country willing to adopt farm-wide conservation programs on their properties. A reversal of this policy is wholly unacceptable to the nation's 3,000 locally organized and operated Soil and Water Conservation Districts," Monk declared.

"I am immediately alerting each of the 15,000 citizens taroughout the nation who serve without pay on the governing bodies of local Soil and Water Conservation Districts about the seriousness of the proposed revolving fund and the other cut-backs," Monk said "It will be the primary issue at our national convention next month"

The name "Christ" comes from the Greek word for "Messiah"

For the Farm Wife and Family

By Mrs. Richard C. Spence

SOUP'S ON!

SPENCE

"Soup's On!" means good eating any time of year, especially when the weather's cold and blustery. Let your family enjoy the hearty nourishment of good hot homemade soups. Whether you make your soup from "scratch" or use the already-prepared frozen or canned soups, you can serve your family nourishing dishes that will satisfy the hearty appetites that come from being out in the snappy weather of winter. Be different with the soup you serve, whether it's for a pair of toddlers or a whole family Try something new and delicious like Chicken Asparagus Soup, easy to make and delightful to eat.

CHICKEN ASPARAGUS SOUP

- 1⅓ cups (10½ ounce can) cream of chicken soup
- 1⅓ cups (10½ ounce can) cream of asparagus soup
- 2 cups milk
- Chopped parsley

In saucepan blend cream of chicken and cream of asparagus soups. Gradually add milk; heat to serving temperature Garnish with chopped parsley. Makes 6½ cups.

* * *

For a hearty quick lunch or Saturday night supper, make old-fashioned Potato Carrot Soup. Chopped onion and carrot steamed in butter enhance the flavor of frozen potato soup.

POTATO CARROT SOUP

- ½ cup (1 stick) butter
- ¾ cup chopped onion
- 1½ cups shredded carrot
- 1 can (10½ ounces) cream of potato soup
- 2 cups milk
- ¼ teaspoon celery salt
- ½ teaspoon salt
- Pepper to taste

In saucepan melt butter. Stir in onion and carrots. Cover, bring to steam, reduce heat and simmer over low heat 10-15 minutes, until carrots are almost tender Stir in potato soup, milk, celery salt, salt and pepper; heat to serving temperature 4 to 5 servings.

* * *

Here's a new way to get your family to eat spinach; put it into a tasty soup. With onion and diced potato, milk and cheese and Worcestershire sauce, it's a hearty, hot meal they'll enjoy.

POTATO & SPINACH SOUP

- ¼ cup chopped onion
- 2 tablespoons butter
- 1 cup water
- ½ teaspoon salt
- 2 cups diced potato
- 2 cups chopped fresh spinach
- 2 cups milk
- 1 teaspoon Worcestershire sauce
- ¼ teaspoon monosodium glutamate
- Shredded Cheddar cheese

In a saucepan combine onions and butter; saute until onions are transparent. Add water, salt and potato; cover and cook 15-20 minutes or until potatoes are tender. Add spinach, bring to boil and cook 1 minute Add milk, Worcestershire sauce and monosodium glutamate; heat to serving temperature but do not boil To serve, top with Cheddar cheese. 4-6 servings.

* * *

Treat your family to Cream of Pea Soup, an old-fashioned bowl of goodness that's so easy to make now. Simmer onion and frozen peas in butter, season with salt and marjoram, thicken with a little flour and blend with milk for a soup that really satisfies on a chilly winter day.

CREAM OF PEA SOUP

- 2 tablespoons butter
- ¼ cup finely chopped onion
- 1 package (10 ounces) frozen peas
- 2 tablespoons flour
- ½ teaspoon salt
- ½ teaspoon marjoram
- 2½ cups milk, scalded

In a medium saucepan, melt butter; simmer onion and frozen peas (not necessary to thaw) until tender (about 10 minutes). Blend in flour, salt and marjoram. Gradually add milk and cook, stirring constantly, until soup is slightly thickened. 3½ cups.

* * *

Use today's convenience foods for satisfying, unusual soups like Cheese Chicken Chowder. With cooked chicken and a package of frozen corn, you have the basis for a tasty tureen of good hot soup Add onion sauteed in butter, diced potatoes, milk and seasonings

CHEESE CHICKEN CHOWDER

- 2 tablespoons butter
- 3 tablespoons minced onion
- 1½ teaspoons salt
- Dash of pepper
- 1 cup water
- 1 cup diced raw potato
- 1 package (10 ounces) frozen whole kernel corn
- ¾ cup (5-ounce jar) cooked, diced chicken
- 1½ teaspoons Worcestershire sauce
- 1 cup (4 ounces) shredded Cheddar cheese

In saucepan melt butter; add onion and cook until tender. Add salt, pepper, water and potatoes Cover, bring to steam, reduce heat and simmer until potatoes are tender. Meanwhile, cook frozen corn in a small amount of water until tender Add undrained corn, hot milk, chicken and Worcestershire sauce to potato mixture Cook, stirring constantly, until mixture reaches simmering point Remove from heat, add cheese and stir until cheese melts Serve immediately Makes about 5 cups.

Ladies, Have You Heard? . . .

By: Doris Thomas, Extension Home Economist

THOMAS

Do You Know

Well-chosen snacks can contribute to dental health and good nutrition. For the best dental health, it's recommended that you cut down on eating sweets between meals.

Nutrition research has established milk as one of our most valuable foods. Milk is the richest source of calcium of the foods commonly eaten in the United States.

Pasteurized-process cheese is a blend of one or more types of cheese, as described on the label. The processing gives a cheese that melts readily and smoothly. Cheese spreads and cheese foods are softer forms of process cheese, and often have added nonfat dry milk and flavor ingredients. Such as olives or pimientos.

Some Hints to Help Improve Ironing Skills

Always be sure clothes are clean before you iron them. Wash anything slightly soiled before ironing it.

Iron with a clean iron. If starch sticks to the soleplate, let the iron cool, then wipe it with a cloth dipped in soap or detergent suds. Rinse and wipe dry before heating.

Wash ironing board cover as needed to remove starch, lint, and dye transferred from dark clothes. Wash a new cover before using it to remove sizing . . . sizing scorches at low heat.

Cover an ironing board when not in use to help keep the cover clean. You can use a fitted washable plastic cover or a paper or plastic garment bag.

Fold dampened clothes lightly instead of rolling them . . . fewer wrinkles will get set into the damp fabric, and less ironing will be needed. If you put dampened garments into a plastic bag, the moisture will be distributed more evenly. Plastic bags are handy to keep non colorfast articles separate from others while they're damp.

forts to change current government farm programs in ways that will reduce total costs without jeopardizing the really essential educational, research, conservation, and credit programs of the U.S. Department of Agriculture.

"We are confident that savings can be made in government farm programs in a manner which will permit commercial family farmers to earn higher, not lower, net incomes," Shuman said.

● Tobacco

(Continued from Page 1)

borhood of 22,000 acres. This came as somewhat of a surprise since it had been hinted that the allotment would be nearer 27,000 acres.

The USDA felt, however, that with supplies at near-record levels a higher quota would have been unrealistic.

If more than one-third of the county's growers vote against quotas at the coming referendum, the whole question goes out the window anyway. Lancaster County growers have never approved tobacco quotas, and the local opinion is that that situation will not change this year.

LARRY BRENEMAN SHOWN RECEIVING PLAQUE from Dr. Gene Love, Penn State University, for his production of 197 bushels per acre in the Pennsylvania Crop Improvement Assn. One Acre Corn Contest. Larry was high in yield, but second in profit with $149. In calculating the area championships P.C.I.A. gives equal weight to yield and profit. Breneman is the son of Mr. and Mrs. C. Henry Breneman, Strasburg R1, and is president of the Garden Spot FFA Chapter at Lampeter-Strasburg High School.

(Continued from Page 1)

sulted in a sharp increase in the number of persons seeking authoritative information on soil conditions, choice of seeds, fertilizers, and the care of trees and shrubbery. He stated that this development, plus the great many farmers coming to the Agricultural Extension Office for helpful information, makes the quarters his agency occupies in the Post Office building quite inadequate.

The concentration of non-profit agricultural agencies "under one roof," with adjoining facilities for meetings of farm organizations, garden clubs, Farm Women's groups, and related events, has been cited as holding major advantages. Supporting this belief are the Lancaster Chamber of Commerce and the Manufacturer's Association of Lancaster County, with both organizations expressing the belief "what's good for agriculture in Lancaster County is good for the whole economy and for living in this locality." Part of the fund-raising effort will be directed among major industries, commercial interests, and individuals, the Campaign Steering Committee has announced.

The conduct of a public appeal for funds for the purpose of establishing a Farm and Home Center, represents the first time in many years that such an effort has been organized in behalf of an agricultural project Upon completion, the Center will be operated by a Board of Directors, on a non-profit basis, with the rental income of agencies located within the building used to help make the over-all facilities self-supporting All contributions for the project are tax-deductible, under a ruling the Farm and Home Foundation has received from Internal Revenue Service.

Transfer Milk Efficiently From Cow to Bulk Cooler

The "Sputnick" MILK-PORTER is the cleanest, most efficient method for transferring milk from cow to bulk cooler.

- Manufactured from heavy gauge stainless steel.
- Lid seals tightly to keep milk germ free.
- Passes through openings 29" and over.
- Moves quiet and easily on rubber-tired, ball bearing wheels.
- Does away with long, expensive pipe lines, milk pumps and releaser.
- Two sizes.
- Low-cost sanitizing.

She'll be a banker when she grows up

Most calves simply grow up to be cows. Some grow up to be a sure source of steady, extra income as well. It all depends upon how you feed them. The Pioneer Feeding Program can make the profitable difference The capacity to handle maximum feed and produce more milk is determined early in your cows' lives, during the calf and heifer stage. Thus, a fruitful feeding program must be designed to meet all the nutritional requirements of growing cattle and to insure efficient production when they join the milking herd.

Dairymen who employ the Pioneer Feeding Program find that it is not only reasonable in cost, but sets the stage for realizing the full production potential of the cow Tomorrow's milking herd is in your calf barn right now, and today is the best time to establish a feeding program that will mean more milk per cow per year. We would like to help you set one up, as we have helped many of your friends and neighbors in this community. Call us or stop in. Your calves, too, can be bankers when they grow up.

ANOTHER ADDITION IN WAYNE FEEDS FACILITIES AND SERVICES

This new facility will enable Allied Mills to provide our customers an economical means of supply with both bulk and bagged feeds. The most up-to-date truck loading methods will be used. The all-weather loading dock at the warehouse and 50-foot truck scale right under the bulk bins, are equipped to load the exact amount of any of the bulk feeds that are carried in stock.

As agriculture continues to move ahead, Allied Mills will try at all times to provide the Research, Facilities, and Services necessary to give our customers "Tomorrow's Feeds Today".
